

MVCA PRE-SCHOOL ADDITION PROGRESSES

Mission Valley Christian Academy is enlarging their current building, adding a much needed pre-school. MVCA plans to offer pre-school by the end of 2021, thanks to a recent grant from the Gianforte Family Foundation.

MVCA has been working toward expanding both campus size and capacity to provide greater availability for school choice and Christian education in the greater Polson community. New funding will allow MVCA to add approximately 3000 square feet to their current building. The addition will contain three classrooms to house both pre-school and Kindergarten.

MVCA's Principal, Andrew Russell said, "These generous donations are an incredible blessing allowing MVCA to serve pre-school families in the coming year and ultimately free up valuable space in the future community center." While this new funding will allow MVCA to open a pre-school sooner than expected, it will not detract from the future community center and high school project still in the planning phase.

The mission of MVCA is to provide Christ centered quality education to produce life-long servant leaders. For more information about MVCA and their building/expansion projects, please visit their website at <https://mvcapolson.org>.
